EXPANDED WORK EXPERIENCE

- [DevMetric.com](http://devmetric.com)

Jan 2018 – Current

- DevMetric is a site for developers to rate and review development tools
- **Contributed** to the website's design choices, features and development
- **Managed, refined and updated** legacy code that boosted site efficiency by about 20%
- **Updated** the security of the website by replacing the use of cookies that store user ids into sessions and also added filters to user inputs that are sent to the backend
- **Created** technical documentation for future developers
- **Lead** weekly meetings with the CEO, marketing team, and VP of developer communities to communicate and showcase progress of the website
- **Created** a new feature called code of the week, allowing registered users to submit code for others to solve and answer others' submission

- thuytien.me

Oct 2015 – Current

- **Created** a personal website from scratch on GitHub to serve as a portfolio to showcase past projects and accomplishments
- **Making** constant updates to keep up with modern website tools/designs
- **Strengthened** front-end development skills in HTML5, CSS3, JavaScript, and UI/UX
