# Thuy-Tien Nguyen

**San Jose | tweenguyentran@gmail.com | [thuytien.me](thuytien.me)**

## TECHNICAL SKILLS

- **Programming:** HTML5, CSS3, JavaScript, JQuery, Angular.js, Bootstrap, Java, JSP, C++, PHP, MySQL
- **Version Control:** Github, Jira
- **Other:** WordPress, Google Analytics

## EXPERIENCE

**California State Polytechnic University, Pomona**                                            **Pomona, CA**
*CIS Student Assistant, Web Developer*                                                      *Aug 2015 – Dec 2016*

- Designed the **front-end** (HTML5, CSS3, JavaScript) for cyberfed.org, a website dedicated to cyber security competitions
- Discussed with a total of **5 clients** over website designs, process, and its completion
- Worked under **2** senior developers who provided **mentorship** and **guidance** on projects

**AC Air Technology**                                                                              **Chino, CA**
*Web Developer/Designer Intern*                                                          *June 2016 – Sep 2016*

- Enhanced web development skills in **both** front-end (HTM5L, CSS3, JavaScript) and back-end (MYSQL, MSSQL, PHP) by **recreating from scratch** an internal search database for warehouse parts and inventory
- **Produced a flyer and brochure** using Photoshop and Dreamweaver
- Provided for maintenance of local servers and database **daily**

## PROJECTS

- **Facebook CTF Study Resource Website**                                        *Sep 2016 – Dec 2016*
  - Selected to design and develop web presence for Cal Poly Pomona's Computer Information Systems Department
  - Established the **front-end** (HTML5, CSS3, JavaScript) of a website that allowed students to submit and answer questions to practice for Capture the Flag (CTF), a cyber security competition by Facebook
  - **Presented** biweekly reports to client and **participated** in weekly online meetings to discuss progress

- **CIS 466 - Senior Project**                                                               *Sep 2016 – Dec 2016*
  - **Completed** a 10-week project with a client that includes a technical problem, project management, teamwork and creativity
  - **Led** a team of 5 students to create the **front-end** (HTML5, CSS3, JavaScript) of a website for Cal Poly Pomona's student-run data center
  - **Contacted** and met with client to obtain more information and discuss design options
  - Created documentation of processes and data to present to client on a **weekly basis**

## LEADERSHIP

**Cal Poly Pomona Game Design & Development Club**                            *Oct 2014 – June 2016*
*Fundraising Executive*

- **Determined** fundraising goals and **managed** events to meet said goals
- **Reached out** to companies such as Cha for Tea for fundraising opportunities and **established** interpersonal relationships
- Raised about **15%** of club budget within a day during a social bowling event
- Lead an "Introduction to JavaScript and HTML5" workshop to **teach** students interested in web game development

## EDUCATION

**California State Polytechnic University, Pomona**                                          *Dec 2016*
Bachelor of Science, Business Administration - Computer Information Systems (GPA: 3.4)
